1. For the year 1950 the NEF, Berlin-Oberschönewalde, Ostendstr. 1-5, which has been attached to the Oberspreewerke at the same address, has received two Soviet development orders in the amount of 3.5 million DM (East). These development orders refer to the simplification of production processes for the manufacture of telephony installations. Parts of telephony installations have to be designed in such a manner that they can be manufactured cheaply according to modern production processes. The NEF has to deliver to Russia:

- a. Models of the designed and constructed parts of a telephony installation.
- b. A set of the special tools required for their manufacture.
- c. Blueprints of the parts and the special tools based on this material.

Russia will then begin its production of telephony installations.

2. The East German post office has placed an order with the NEF to develop a teletype similar to the one constructed by Siemens and Halske.

3.

4. In the meantime, the Soviets have shipped the major part of the measuring instruments and laboratory equipment of the NEF to Soviet Russia. They have even gone so far as to include two coil-winding machines and one heliograph.
